ENROLLING A PATIENT
into the NDB-Cimzia® safety registry

It’s simple to enroll a patient in the NDB-Cimzia® Study.
Here's all you have to do.

1. Identify a RA patient who has started Cimzia® or a nonbiologic DMARD within the last 6 months---whether or not the patient is still receiving that treatment.

2. Explain the study to the patient and obtain a signed informed consent. Make sure the patient completes the brief questionnaire. Give the patient a copy of the consent form.

3. Completely fill out the physician form on the other side of this instruction form.

4. Fax (316-262-0382) the completed physician form and the signed and completed patient form to us or use the return envelope to mail the forms.

THAT'S IT! Your help is much appreciated!

HAVE QUESTIONS?
Please refer to the letter, study overview, or website, www.ndbcimzia.org, for other information on the study.

People who can assist you and your staff with questions or problems are:

Rebecca Schumacher, Executive Director, 1-800-323-5871 ext. 119 or email: rebecca@arthritis-research.org

Fred Wolfe MD, NDB Director, 1-800-323-5871 or email: fwolfe@arthritis-research.org

NOTE: Be sure to let us know when you need more study supplies by calling (316)263-2125 or (800) 323-5871 or emailing: rebecca@arthritis-research.org
Physician's Form

Physician Name: ________________________________

Patient Name: ________________________________

Today's Date: mm / dd / yyyy

1. I have explained the study to the patient and the patient does have a diagnosis of rheumatoid arthritis. □ Yes □ No

2. This patient has:

☐ Started Cimzia® within the last 6 months. Date prescribed: mm / dd / yyyy

OR

☐ Started a nonbiologic DMARD within the last 6 months.

   Date Prescribed: mm / dd / yyyy

   Drug Prescribed: ________________________________

3. The patient has completed and signed the patient consent/enrollment form and it is included with this form. □ Yes □ No

Please be sure that you have completed all questions on this form and the patient's form is filled out completely. We need this information to contact the patient.
